

# ITU PRESENTS

Connecting Silicon Valley Through Conversation

HISPANIC HERITAGE MONTH 2018  
SEPTEMBER 15 - OCTOBER 15

## 170 YEARS OF AMERICAN LATINO INVENTION AND INNOVATION

Presented by Tom Tafolla  
Chair, Engineering Management

This year we are highlighting 170 Years of American Latino Invention and Innovation in celebration of Hispanic Heritage Month.

Tom Tafolla's ground-breaking work brings forth the achievements of Latinos in aeronautics and other STEM fields. His research as a Lemelson Fellow uncovers the amazing case of Belen Quezada who obtained a utility patent for the invention and design of the "Flying Machine" here in San Jose, California.

Come meet him in person and learn more about Latino invention and innovation.

Please RSVP
