Subject: If inventors w/patents have no protection,

then if America is looking for ideas and promote creativeness in schools and places of work, why should young and old people try, there will be no reward, only a waste of time,...this will hurt America and what we stand for.

By the way, United We Stand...divided we will fall (like other countries before us. We are young as a country and can learn from other older countries, not to repeat their mistakes..Let us play it smart !)

Sincerely,

Dory M. W.

U.S. Inventor (Patent Holder)

2019
